English: APTIS Certificate Level C   *04/2021*

PROJECTS

Bloggerum | Forum for writers

Live Site: https://bloggerum.xuanhung.dev/   *Source Code: https://github.com/xuanhung1509/bloggerum*

- Architect the application's flow, server and responsive design
- Implement session-based authentication
- Build MongoDB queries with aggregation operations
- Upload image to a S3-compatible object storage

Component library for online learning platforms

Live Site: https://question-library.netlify.app/

- Define API that is easy for other teams to adopt and expand
- Thorough documentation with Storybook and Typescript, demonstration for different use cases
- Implement complex animation, drag and drop and reorder with Framer Motion

Duyenkim | Beauty & Haircare E-Commerce website   *07/2023 - 10/2023*

Live Site: https://duyenkim.com

- Communicate with clients and analyse feature requests
- Define the architecture and roadmap, design application interface and user flow
- Build modern front-end with NextJS and custom admin panel with SanityCMS

EXPERIENCE

Tuyensinh247 - Front-end Developer   *08/2022 - 04/2023*

Technologies

- Legacy Front-end project: React 16, Material UI, Bootstrap, Webpack 4
- Incrementally adopt new technologies: Sass/Scss, Git hooks

Responsibilities

- Communicate with Product Owner, Design team and Back-end team to define the feature roadmap.
- Evaluating current technologies and advocate for new technologies: Monorepo, Linter, Sass/Scss, TailwindCSS
- Implement functionalities as requested. Refactor code, suggest improvements and optimize Front-end performance following best practices.

ACADEMIC BACKGROUND

Foreign Trade University   Bachelor of International Finance | GPA 3.39   2020 - 2024, Hanoi
